## OBJECTIVE

Full Stack Developer with a strong foundation in JavaScript, HTML, and RESTful APIs. Skilled in building scalable web applications with experience in frontend, backend, databases, and cloud deployment. Currently expanding expertise in **.NET development**. Passionate about solving real-world problems and contributing to dynamic teams.

## EDUCATION

|                                                                                                                                           |                                    |
|-------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|
| <b>Velammal College of Engineering and Technology</b><br><i>B.E. – Computer Science and Engineering</i> — CGPA: 7.01 (up to VII Semester) | Madurai, Tamil Nadu<br>2022 – 2026 |
| <b>St. Joseph Matriculation Higher Secondary School</b><br><i>HSC (Class XII)</i> — Percentage: 74.66%                                    | Madurai, Tamil Nadu<br>2021 – 2022 |

## INTERNSHIP

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                     |

| <ul style="list-style-type: none"><li>Developed and optimized front-end components using React.js, improving UI responsiveness and reducing page load time.</li><li>Collaborated with the backend team to integrate REST APIs, enhancing data flow and user experience across modules.</li><li>Built reusable UI components and debugged cross-browser issues, ensuring consistent rendering across major browsers.</li><li>Implemented efficient state management practices, streamlining data flow and boosting overall application maintainability.</li><li>Assisted in the documentation of code changes and RESTful endpoints, ensuring smoother knowledge transfer across the team.</li><li>Participated in Agile sprint meetings and code reviews, contributing to on-time delivery of project milestones.</li></ul> |                     |

## PROJECTS

- HireSight – AI Recruitment Platform** | *React.js, Node.js, NLP, Blockchain*
- Built an AI-powered recruitment system achieving 80% candidate-job matching accuracy using NLP and semantic similarity models.
  - Implemented blockchain-based credential verification to prevent fraud and ensure tamper-proof candidate records.
  - Developed full-stack application with React.js frontend and Node.js backend with role-based access control for all user types.
  - Engineered a robust Node.js backend architecture to parse and process multiple candidate profiles simultaneously with minimal latency.
  - Created tailored dashboard analytics providing recruiters with actionable insights on candidate sourcing pipelines and matching metrics.
- Hospital Management System** | *MongoDB, React.js, Node.js*
- Developed a hospital management system enabling patients to book appointments online, reducing manual scheduling overhead.
  - Designed a responsive patient portal using React.js, enhancing accessibility and user experience across both web and mobile devices.
  - Built an admin panel for managing doctor availability, patient records, and appointment history with real-time notifications.
  - Optimized backend database queries in MongoDB, significantly reducing data retrieval times for large sets of patient histories.
  - Ensured data security through role-based access control and strict JWT authentication, protecting sensitive patient information.

## TECHNICAL SKILLS

**Languages:** Java, HTML, CSS, SQL, JavaScript  
**Frameworks & Libraries:** React.js, Node.js, .NET (Currently Learning)  
**Databases:** MySQL, MongoDB  
**Tools:** VS Code, Android Studio, Git, GitHub  
**Specializations:** Full-Stack Development, Object-Oriented Programming

## CERTIFICATIONS

**Introduction to SQL** – GUVI  
**Cloud Computing** – NPTEL  
**Social Networks** – NPTEL  
**Python 101 for Data Science** – IBM  
**Git & GitHub Workshop** – Reccsar  
**HDCA** – Honours Diploma in Computer Application
